Reports and Analyses

[An assessment of ethical dimensions of corruption](#)

Corruption assessed in absolute terms is unethical. However, if one were to use relativistic views, one would make allowances for 'mild' forms of corruption like seeking favours to obtain unwarranted advantages or paying bribes in the form of 'speedup gratuities'. Our study shows that in many contexts, acts of corruption are accepted and justified either on the basis of the gains they bring to the individual who offered the bribe or undertake to seek the particular favour.

Geetanee Nepal, Electronic Journal of Business Ethics and Organization Studies, Vol. 11, No. 1 (2006)

[Ethics, Corruption, and Economic freedom](#)

Some economists believe that the importance of economics is purely technical. Others believe that moral considerations in economic analysis provide a more accurate picture of possible outcomes since it takes into consideration the human aspect of economic actors--that is, people.

Ana I. Eiras, The Heritage Foundation, 2003, Lecture on Trade and Economic Freedom
